INFORMATION

The British Psychoanalytical Society was founded in 1919. Soon after, the Institute of Psychoanalysis was established

to administer the Society's activities. These include: the development of the theory and practice of psychoanalysis, the training and further education of psychoanalysts, the provision of treatment through the London Clinic of Psychoanalysis, publishing books and journals, maintaining a library, research and public lectures.

The Society is a component society of the International Psychoanalytical Association, a body with members on all five continents, which safeguards professional standards and oversees the stages by which new societies are created. It is also a member of the British Psychoanalytic Council, which publishes a register of British psychoanalysts, analytical psychologists, child psychotherapists and psychoanalytic psychotherapists. All members of the Society abide by the Code of Practice and Code of Ethics of the Council.

The Society currently has 432 members and 45 candidates. The majority of them live in or near London, though there are 158 members in many different countries and in other parts of the British Isles. Many psychoanalysts work in public organisations, principally in the Health Service, as well as in private practice. Recently, it has become possible for those living at a distance from London, to do the Training.

Those accepted for training come from a variety of backgrounds; the usual age of people beginning the training is between 30 and 40. Many are medically qualified, and the remainder are psychologists, social workers or academics, with the occasional student from another background. The training takes a minimum of four years and its main elements are: a personal analysis, which lasts from at least a year before the student starts seminars until at least his or her qualification, a psychiatric placement for non-medical students, theoretical and clinical seminars,

and the supervised psychoanalysis of two patients. There is also a two-year post-qualification course and a training in child and adolescent psychoanalysis.

The London Clinic of Psychoanalysis offers a Consultation Service for anyone who may be interested in having a consultation with a qualified and experienced psychoanalyst. Recommendations for further treatment may include an analysis through the low-fee scheme at the Clinic or referral to a qualified psychoanalyst through the referral service. The Clinic has about 100 patients in treatment and the Child and Adolescent Department provides assessment and treatment for young people.

Through its work, and the work of its individual members, The British Psychoanalytical Society has made a unique contribution to the understanding and treatment of mental illness. Members of the Society have included Michael Balint, Wilfred Bion, John Bowlby, Anna Freud, Ernest Jones, Melanie Klein, Joseph Sandler and Donald Winnicott.

A list of psychoanalysts can be found on the Society's website. For further information please contact Nick Hall, Institute Manager, 020 7563 5005. For information about treatment for adults, adolescents or children, contact Trudy Turner, Clinic Executive Officer, 020 7563 5002. For psychoanalytic training, contact Luke Perry, Training Executive Officer, 020 7563 5015. For the library phone 020 7563 5008. For general enquiries phone 020 7563 5000. www.psychoanalysis.org.uk
